Short Description

Practical chest freezer that, despite its size, has a capacity of 99 liters. The box has a strong insulation which ensures efficient freezing with low operating costs and freezing capacity of 6 kg/24 hours. CF100WD is ideal for smaller households or as a supplement to freezer storage. In addition to providing flexible capacity, the freezer box is also easy to operate and easy to clean.

The chest freezer has a "two in one" function, which means that the freezer can run in a temperature range of -12°C to -24°C and the refrigerator temperature from 8°C to +2°C, so the freezer can also be converted into a cold room.

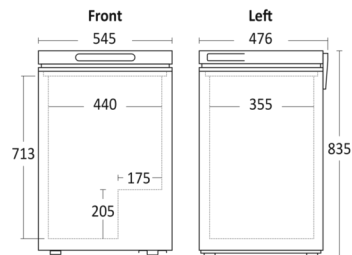

The chest freezer can stand in dry environments down to -15°C, which is optimal if, for example, it is to be placed in a garage. The lid can stand at different angles of 45°-75° – comfortably so the lid doesn't just snap in.

Integrated energy-saving LED light in the lid provides a good overview in the box. The temperature is easily adjusted on the manual panel on the front.
